

Environment Policy

This Subsea & Pipelines Engineering Consultancy (SPEC) Policy affirms the responsibilities, commitments and actions of the Company, its Directors, employees, contractors and associates in meeting the Company's standards for minimising the impact our consultancy and inspection activities have on the environment.

Our Commitment

In order to meet the Company's standards regarding every aspect of delivering this Policy, the Directors, personnel and any third parties acting in the name of the Company undertake to:

Our Actions

In order to meet the Company's standards regarding every aspect of delivering this Policy, the Directors, personnel and any third parties acting in the name of the Company undertake to:

1. Consider the impact of every activity we undertake on the environment, and take steps to reduce that impact through re-use, recycling, materials use reduction and increased process efficiency where possible.
2. Seek ways to prevent pollution, emissions and waste output in all activities including travel.
3. Set explicit environmental goals and success criteria and ensure they are tracked, measured and communicated to all involved personnel.
4. Provide comprehensive environmental standards and objectives training, including location and site specific training.
5. Participate in discussions about environmental with all relevant local community, state and national authorities wherever possible.
6. Understand and comply with all legal, regulatory, client environmental laws and other compliance obligations in all countries or areas where we are required to operate.
7. Ensure that all record keeping is diligent, up-to-date, accurate and true.
8. Report any behaviour that may breach any part of this policy to the Supervisor, Manager or Director responsible for the conduct of this Policy.
9. Maintain and continually improve an environmental management system based on the ISO 14001.

Matt Lancien
Principal Engineer & Company Director
